

MUHAMMAD JAWAD

SOFTWARE ENGINEER | SECURE SOFTWARE DEVELOPMENT | MSc CYBER SECURITY

Glasgow, Scotland, UK | 07771 555392 | mjawad.se@gmail.com | [Portfolio](#) | [Linkedin](#) | [Github](#)

PROFESSIONAL PROFILE

Software Engineering graduate and MSc Cyber Security graduate with professional experience across full-stack development, enterprise platforms, workflow automation and API integrations. Experienced in JavaScript/TypeScript, React, Node.js, REST APIs, SQL/MongoDB and enterprise development, with Python exposure through security-focused application development and machine-learning integration. The MSc built on a core software engineering foundation with deeper knowledge of secure coding, authentication and authorisation, access control, vulnerability analysis and security-focused application design. Brings a secure-by-design mindset to building reliable, maintainable software and solving technical problems collaboratively across the software development lifecycle.

TECHNICAL SKILLS

Programming & Development: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3, JSX

Frameworks & APIs: React, React Query, Node.js, Express.js, Flask, Bootstrap, REST APIs, SOAP APIs, JSON

Data & Cloud: MongoDB, Cloudflare D1, Drizzle ORM, Cloudflare Workers

Software Engineering: SDLC, Agile/Scrum, requirements analysis, reusable components, debugging, testing, deployment, performance optimisation, Git/GitHub

Secure Development: secure coding principles, authentication, authorisation, role-based access control, input validation, API security, access controls, HTTPS, vulnerability analysis, secure secret management

Enterprise Technology: ServiceNow, Flow Designer, Integration Hub, Automated Test Framework, ITSM, ITOM, SecOps

PROFESSIONAL EXPERIENCE

ServiceNow Developer | RT Tech Solutions Group | USA (Remote)

Nov 2023 - Jan 2025

- Translated requirements from HR, IT and security stakeholders into scalable ServiceNow applications, automated workflows and user-facing services using JavaScript, Business Rules, UI Policies and Flow Designer.
- Built and maintained REST/SOAP integrations, Scripted REST APIs and JSON-based data exchanges between ServiceNow and external enterprise systems.
- Worked across the software delivery lifecycle from requirements analysis and development through Automated Test Framework testing, UAT and controlled deployment across development, test and production environments.
- Implemented role-based access controls, investigated production issues under SLA expectations and supported colleagues with testing and development guidance.

Software Engineer | TradsTeam UK | Remote

Jun 2023 - Dec 2023

- Developed responsive React applications using reusable component-based architecture, JavaScript, HTML, CSS, Bootstrap and React Query.
- Integrated frontend components with REST APIs and managed application data to deliver reliable, user-focused software journeys.
- Collaborated with UI/UX designers and QA colleagues through Agile/Scrum activities, contributing to requirements clarification, implementation, testing and deployment.
- Improved maintainability and frontend performance through reusable components, efficient data handling and rendering optimisation.

MERN Stack Developer | Pure Logics | Lahore, Pakistan

Feb 2023 - May 2023

- Developed responsive web interfaces using React.js, JavaScript and Bootstrap, applying reusable component-based development.
- Built server-side functionality and RESTful APIs using Node.js and Express.js with MongoDB for application data and CRUD operations.
- Implemented authentication and authorisation middleware to protect API routes and role-based functionality.
- Strengthened debugging, testing and problem-solving skills through coding challenges and full-stack application delivery.

SELECTED SOFTWARE & SECURITY ENGINEERING PROJECTS

PhishGuard - Hybrid Phishing Detection Browser Extension | JavaScript | Python/Flask | ML/NLP

MSc Project

- Designed and developed a real-time phishing-detection browser application combining a JavaScript browser extension with a Python/Flask machine-learning inference service.
- Engineered security-focused features using URL characteristics, page content, HTTPS signals and domain intelligence; evaluated Decision Tree, Random Forest, SVM and XGBoost through structured testing.
- Applied cybersecurity knowledge to application design by considering malicious inputs, suspicious behaviours and security signals; dissertation grade 76.2% (A3).

Full-Stack Dynamic Portfolio | React | TypeScript | Node.js | Cloudflare

Project

- Built and deployed a full-stack application with a responsive React interface, server-side routes, protected administration and cloud database storage.
- Implemented authenticated CRUD, JSON handling, input validation, reusable API routes and secure secret management, with a focus on maintainability and extensibility.

Kitchen Connect | React | Node.js | Express.js | MongoDB

Project

- Developed role-specific dashboards for customers, restaurants, chefs and administrators using a MERN architecture.
- Implemented OTP-based authentication and permission-controlled functionality and integrated responsive frontend workflows with RESTful APIs.

EDUCATION

MSc Cyber Security with Distinction | University of the West of Scotland, UK

Jan 2025 - May 2026

- Overall average: 72%. Dissertation: Phishing Website Detection Using NLP and a Browser Extension - 76.2% (A3).
- Built advanced knowledge of application/network security, vulnerability analysis, incident response, threat intelligence and secure system design on top of an existing software-engineering foundation.

BSc Software Engineering | Superior University, Lahore, Pakistan

Oct 2019 - Oct 2023

- GPA: 3.32/4.00. Core foundation in programming, databases, web technologies, software engineering methodologies and application development.

CERTIFICATIONS & LEADERSHIP

Certifications: ServiceNow Certified System Administrator | Career Essentials in Software Development | TryHackMe Pre-Security | CompTIA Security+ (In Progress)

Leadership: Student Voice Leader | Ambassador of Exchange Program, International Office
